

What is claimed is:

1. A wireless pointing device, comprising  
a body having an opening; and  
a power-supply module;  
5 wherein the power-supply module is arranged to carry at least one battery; to  
be inserted into the opening in order to supply power from said battery to said  
pointing device, and to be drawn out from the opening for replacement of the  
battery..
2. The pointing device as claimed in claim 1, wherein the body has a  
10 circuit board, and a least a metal plate extending from the circuit board for  
electrically contacting the battery.
3. The pointing device as claimed in claim 1, wherein the power-supply  
module has a carrier for containing the battery;  
each of the side of the carrier having a flange, and correspondingly each side  
15 of the opening having a groove for receiving the flange.
4. The pointing device as claimed in claim 1, wherein the power-supply  
module is fixed to the body by a fixing device.
5. The pointing device as claimed in claim 1, wherein the fixing device  
includes a hook located on the body, and a recess correspondingly located on  
20 the power-supplying module.
6. The pointing device as claimed in claim 1, wherein the pointing device  
is a computer mouse or trackball.
7. The pointing device as claimed in claim 1, wherein the pointing device  
is a wireless input device.
- 25 8. The pointing device as claimed in claim 7, wherein the input device is  
a game controller.
